Pre-Surgery Instructions

-  No food after midnight the night before surgery.
-  Do not withhold water prior to surgery.
-  Vouchers, if applicable, must accompany pet at time of drop off. **NO EXCEPTIONS UNLESS PRE-APPROVED!**
-  Drop off is between 7:00am and 9am.
-  Cats must be in carriers and dogs must be on a leash.
-  If cat or dog is pregnant, in heat, recently whelped, or if a dog weighs more than voucher states, owner must pay the difference at BRVA at time pet is released. Additional fees apply for cryptorchid males and obese patients as well. The charge is usually \$80 for rescue patients (\$250 regular price). This fee can be paid directly to BRVA, and does not need to be included on a voucher.
-  For your convenience, pets may be dropped off between 7pm and 9pm the evening before surgery for half-of-a-technician inpatient care charge. This fee can be paid directly to BRVA, and does not need to be included on a voucher. Animals must be current on Rabies and Distemper vaccines to be admitted overnight in our treatment/recovery area, or vaccines will be administered. Bordetella is strongly recommended. Owner must present voucher for all vaccines, or will be charged full price for them. Non-voucher Rescues may be billed directly.
-  Pets should be picked between 7pm and 9pm. Rescue surgeries are performed early in the day, so pets are likely to be recovered enough for release by 6pm. However, please call to be sure pet is ready to be released if you haven't already heard a progress report from our patient advocate team. Records will be ready by 6pm, however, leaving pet in-hospital until later will allow Veterinarian to observe for a more optimum time.
-  If a patient stays overnight due to slow recovery or owner chooses to keep patient for observation and/or confinement, a technician inpatient charge, currently \$30, will apply for each night. Three days post-surgery, a fully vaccinated animal can usually be released from technician care to boarding; lower rates may apply.
-  Check vouchers for expiration dates. They are not replaceable, and must be returned to Rescue Group for refund, if necessary. Treat vouchers as you would cash.
-  If rabies vaccine is not purchased from BRVA, a valid rabies certificate must be presented to Veterinarian at time of hospitalization or else another vaccine must be given by BRVA and billed to owner. Double-vaccination will not be harmful to pet, but is an added expense not necessary if owner complies.
-  Pets' nails will be trimmed while under sedation at no charge to owner. If this service is not desired, please ask check-in receptionist to note file accordingly.
-  A new-client information sheet will be presented for owners of pets to fill out and sign. Please ask them to allow a few minutes at drop-off time to complete.
-  E-Collars (to prevent licking/chewing), antibiotics, and/or pain injections may be prescribed post-surgery, and are not included in cost. Rescue pricing may apply.
